

IMPROVED ADHESION IN ONE SIMPLE STEP

E5320 is a two-component, water-based epoxy primer designed to deliver strong, reliable adhesion in demanding conditions. Ideal for use on most roofing surfaces—including metal roofs, flashings, and aged substrates—E5320 bonds to properly prepared surfaces and boosts the performance of Gaco coatings. It's especially effective on weathered roofs that are difficult to clean completely.

This versatile primer doesn't just improve adhesion—it also enhances overall roof protection. On asphalt-based surfaces, it may help prevent bleed-through and, once top coated, it provides an added layer of defense against corrosion. Mixed with ordinary sand, GacoFlex E5320 becomes an effective masonry block filler, expanding its use beyond the roof.

PROPER SURFACE PREPARATION IS CRITICAL

For best results, take the time to thoroughly prepare the roof surface. Carefully inspect for any open seams, tears, or other damage and complete all necessary repairs.

Next, pressure wash the roof and apply GacoWash Concentrated Cleaner to eliminate contaminants that could interfere with adhesion. Allow the surface to dry completely—no moisture should remain—before applying primer. A properly prepared surface is the key to long-term coating performance.

FORMULATING EVERYDAY SUCCESS

Gaco is the recognized leader in innovative roofing systems for a variety of commercial, industrial and residential applications.

Now, with an expanded adhesives, coatings and sealants portfolio covering every level of the building envelope, Gaco is your single-source partner in delivering project success.

PROVEN PERFORMANCE

Products manufactured in-house and proven on job sites across the country.

PROGRESSIVE FORMULATIONS

Focused on reducing costs and adapting to new codes and standards.

BEYOND-THE-BUCKET SUPPORT

Training and on-site technical expertise.

FLEXIBLE WARRANTIES

Confidence for you and your customers.
