

SUSTAINABLE INSULATION FOR AN ENERGY-EFFICIENT ROOF SYSTEM

GacoRoofFoam is a sprayed-in-place polyurethane that goes on as a liquid and expands into a closed-cell foam that bonds to any roof shape, forming a durable, monolithic barrier. It's ideal when you need extra insulation for comfort, energy savings, or code compliance. Use it to build slope for drainage on flat roofs, seal around penetrations, or when fastening is tough due to concrete decks or unique roof designs. It's also a smart choice when a full tear-off isn't practical due to cost or downtime.

Once applied, the foam is coated with an approved GacoFlex coating to protect the surface and boost energy efficiency through added reflectivity. As a single-source provider of both spray foam and coatings, Gaco makes it easy to build a complete, high-performance roofing system—backed by trusted support and proven performance.
