U9 SERIES

URETHANE ROOF SYSTEM

The U9 Series Urethane Roof System is a single-component, liquid-applied waterproof system consisting of three products:

GACOMASTIC

A fiber-reinforced mastic product for use on details and seams. Embedded fabric eliminates the need for three coarse applications, which significantly reduces installation time.

U91 BASE COAT

The base coat may be brush-applied, rolled or spray-applied, and can be applied in 3-4 coats depending on warranty requirements. The U91 Aromatic base coat is colored gray to differentiate it from the topcoat, ensuring proper coverage.

U92 TOP COAT

The finish coat is white to enhance UV resistance and reflectivity. Generally, the coating surface can receive another coat within 10-12 hours and may be walked on within 24 hours.

ROOF REPLACEMENT

GacoFlex RoofFoam HFO (SPF) insulation, combined with the U9 Series of products, provides an excellent roof replacement solution at a fraction of the cost of traditional roofing systems. The system provides high R-value and forms a monolithic insulation and weather-tight seal that fully adheres to any shape or substrate.

ROOF MAINTENANCE

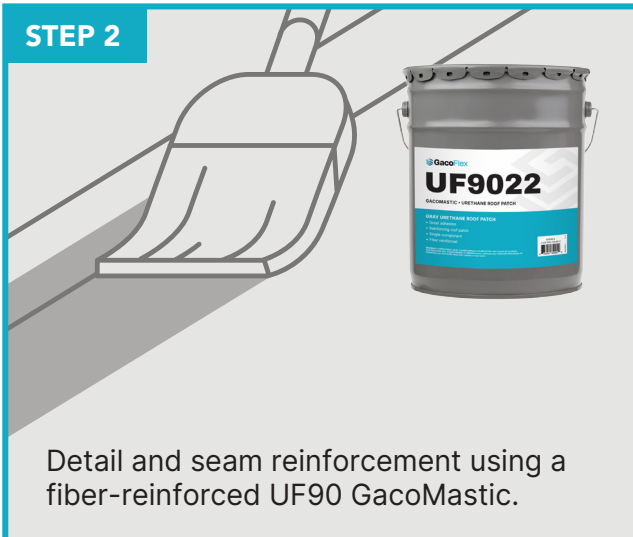

The U9 Series can be used over many substrates including metal, asphalt and single-ply roofing systems, and is the ideal coating solution for rejuvenating existing roofs that require high durability and impact resistance.
