U9 SERIES

The **U9 Series Urethane Roofing System** is a single-component, liquid-applied waterproof system consisting of three products. The combination makes up a complete urethane roof system with warranties of up to 20 years.

GacoMastic is a fiber-reinforced mastic product for use on details and seams. It eliminates the need for three-coarse applications with embedded fabric, thus significantly reducing installation time.

GacoFlex U91 and U92 may be brush-applied, rolled, or spray-applied and can be applied in 3-4 coats depending on warranty requirements. The U91 Aromatic base coat is colored gray to differentiate it from the top coat, ensuring proper coverage. The finish coats should be U92 Aliphatic, which is white to enhance UV resistance and reflectivity. Generally, the coating surface can receive another coat within 10-12 hours and may be walked on within 24 hours.

Roof Maintenance

The U9 Series can be used over many substrates including metal, asphalt, and single-ply roofing systems, and is the ideal coating solution for rejuvenating existing roofs that require high durability and impact resistance.

ROOF MAINTENANCE SIMPLIFIED

STEP 1

Start with a clean, dry surface.

STEP 2

Detail and seam reinforcement using a fiber reinforced UF90 GacoMastic.

STEP 3

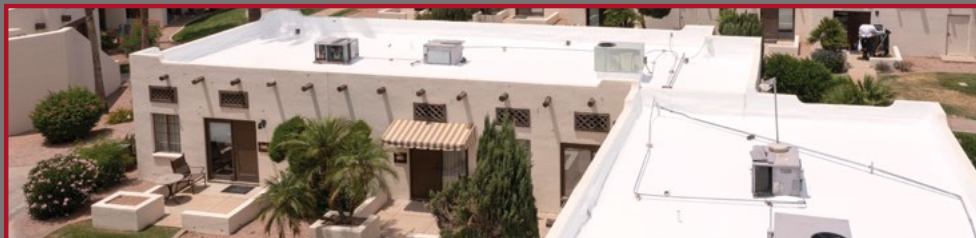

Apply U91/U91C Aromatic as the gray-colored base coat.

STEP 4

The finish coat should be U92 Aliphatic Top Coat which is white to enhance UV resistance and reflectivity.

Roof Replacement

GacoRoofFoam HFO (SPF) insulation combined with the U9 Series of products is an excellent roof replacement solution at a fraction of the cost compared to traditional roofing systems. The system provides high R-value and forms a monolithic insulation and weather-tight seal that fully adheres to any shape or substrate.
