# GacoPoly FastPass

New GacoPoly FastPass is a UV-stable, low-odor, three-component aliphatic urethane coating designed for pedestrian and vehicular decking applications such as parking decks, balconies, and ramps. Its convenient packaging combines all three components into a single pail, making handling and application even easier. The single-pass application streamlines the coating process by eliminating the need for multiple coats or broadcasting aggregate, reducing both application time and labor costs. The integral texture of GacoPoly FastPass simplifies applications for both pedestrian and vehicular traffic, allowing for a faster return to service.

#### USES:

- **Parking Decks**
- **Roof Decks**
- **Balconies**
- **Breezeways**
- **Ramps**
- **and More**

#### PACKAGING:

PEDESTRIAN - **1.5 gallon kit**
