

HSW-QUALIFIED AIA CONTINUING EDUCATION COURSES

Gaco leads the industry with a portfolio of proven solutions that deliver success on every level of the building envelope—from the ground up. Backed by over 70 years of innovation, we understand the complex, evolving technical challenges architects and building envelope designers face every single day.

Because proven solutions require proven knowledge, our accredited American Institute of Architects (AIA) courses are designed to bring that deep expertise straight to your firm. All courses listed below are approved for 1 American Institute of Architects Continuing Education Unit (CEU).

HIGH-PERFORMANCE NON-SKID COATINGS

This course reviews high-performance coating strategies engineered for pedestrian and vehicular traffic. Explore heavy-traffic chemistries, resin technologies, and proper surface preparation and moisture testing methods. By integrating dynamic coefficient of friction (DCOF) and ADA life-safety standards, you will gain the practical skills needed to specify resilient systems that withstand vehicular abrasion and enhance safety.

1 CEU

Course Code: ACSGFLOOR

ROOF COATINGS - A SUSTAINABLE SOLUTION

This course introduces commercial roof coatings, exploring key chemistries, compatible substrates, and critical application factors. Gain a foundational understanding of how engineered coating systems enhance performance, extend assembly lifespans, and deliver cost-effective maintenance and restoration.

1 CEU

Course Code: GACO001

WATERPROOFING SOLUTIONS

This presentation reviews critical waterproofing strategies for parking decks and below-grade applications. Learn to tackle water intrusion, prevent structural corrosion, and select high-performance systems that maximize safety and service life.

1 CEU

Course Code: GACO002

SPRAY FOAM MONOLITHIC ROOF SYSTEM

This course reviews Spray Polyurethane Foam (SPF) roofing systems for high-performance building envelopes. Explore installation methods, thermal benefits, protective coatings, and specification best practices to optimize energy efficiency, durability, and code compliance.

1 CEU

Course Code: GACO003
